DESIGN DIRECTION	PALETTE	HERO BANNER	TYPE
Premium travel Option A	Navy gold warm white	Luxury car + highway, dusk	Fraunces DM Sans DM Mono

SECTION 01

Dark navy & golden *premium, clean, modern.*

Of the three moods in the proposal (slide 16), **Option A Premium Travel** is approved: deep blue, gold and warm white, destination-led photography. This page is the filter for every design decision.

OPTION A CHOSEN

Premium travel

Deep navy, gold & white.
Destination-led photos, editorial serif headlines, quiet luxury.

APPROVED BUILD THIS

OPTION B PARKED

Modern travel

Bright blue & orange, bold lively cards.
Too loud for premium positioning.

OPTION C PARKED

Clean professional

Navy & white, minimal accent. Safe, but misses the brand's golden warmth.

BRAND PILLARS WHAT THE SITE MUST FEEL LIKE

★ Premium

Chauffeur-grade polish. No clutter, generous space.

★ Clean

One idea per screen, one obvious next action.

★ Modern

Fluid type, real photography, subtle 180ms motion.

★ Trustworthy

Transparent fares, visible contact, payment trail.

COLOUR BALANCE ON EVERY SCREEN THE 60 / 25 / 15 RULE

60% NAVY & DARK SURFACES

25% WARM PAPER

15% GOLD (MAX)

Gold is the seasoning, never the main course.

If a screen feels loud, reduce gold first premium comes from restraint.

DO / DON'T THE FAST QUALITY CHECK

✓ Full-viewport hero: luxury car + highway photo under a navy overlay

✓ Fraunces serif headlines; gold italic on one key phrase

✓ True black-navy (#0B171E) surfaces, warm paper sections between

✓ Real fleet photos, graded to the navy/gold palette

✗ No orange-red CTAs or blue-purple gradients off palette

✗ No system-ui fallbacks self-host the three fonts

✗ No pure #000 black or pure #FFF white use warm variants

✗ No clip-art cars or generic handshake stock photos

SECTION 02

The colour package

navy first, gold second.

Every token ships as a CSS variable (handoff, p.14). Tokens are renamed from the proposal deck (--ink becomes --navy, --saffron becomes --gold); hex values are unchanged.

NAVY SCALE STRUCTURE, HEADER, FOOTER, TEXT

 Navy Deep #0B171E --navy-deep Page bg, header, footer, hero overlays the night-highway base.	 Navy #10212D --navy Primary text on light; dark sections and card surfaces.	 Navy Soft #173444 --navy-soft Raised panels on navy: booking widget, admin views.	 Navy Tint #EEF0EA --navy-tint Light card surface with a cool cast (services, tables).
--	---	--	---

GOLD SCALE ACTIONS & ACCENTS ONLY

 Gold #E5A044 --gold Primary CTA fill, active states, fares, ratings, keylines.	 Gold Light #F3C36C --gold-light Accent text and italic headline words on navy only.	 Gold Deep #B27123 --gold-deep CTA hover/darken; graphic accents on paper.	 Gold Wash #FBF1DE --gold-wash Tinted panels: fare summary, offers strip.
---	--	---	---

WARM NEUTRALS LIGHT SURFACES & MUTED TEXT

 Paper #F5F0E8 --paper Default light page background between navy sections.	 Paper Light #FCFAF6 --paper-light Cards, form fields, elevated surfaces on paper.	 Paper Dark #EAE4DA --paper-dark Inset panels, note blocks, zebra rows, dividers.	 Warm White #FFFDf8 --white Headline text on navy. Never use pure #FFFFFF.
--	---	---	---

SUPPORTING ACCENTS EDITORIAL & INFORMATION

 Coral #E16F4B --coral Italic serif accent inside light headlines; tiny editorial marks.	 Teal #4D8580 --teal Informational accents: availability, on-route, map pins.	Muted greys --muted #AEB8B9 on navy; on light use --muted-2 #5B656D (AA), not the deck's #778087 it only reaches 3.5:1 on paper, so it stays decorative. Airlines rgba(16,33,45,.14) on light, rgba(255,255,255,.16) on navy.
---	--	--

SECTION 02 CONTINUED

Gradients, overlays & measured contrast.

SIGNATURE SURFACE RECIPES COPY THESE EXACTLY

HERO OVERLAY TEXT SIDE
Keeps headlines legible over any photo

```
linear-gradient(90deg,
  rgba(11,23,30,.96) 0%, .74 47%, .17
  100%)
```

CARD OVERLAY THUMBNAILS
Fleet & destination image bottoms

```
linear-gradient(180deg,
  rgba(13,31,38,.10) 0%, .62 100%)
```

GOLD HIGHLIGHT
Offers strip, 'starting at' fares

```
linear-gradient(90deg, #E5A044 0%,
  #F3C36C 100%)
```

FILM GRAIN ON PHOTOGRAPHIC AREAS (SUBTLE, ALWAYS)

SVG turbulence at 16% opacity over photos the quiet-luxury texture from the deck. Never on flat panels.

```
<filter id="#n">
  <feTurbulence baseFrequency=".82" numOctaves="3"/>
  <rect filter="url(#n)" opacity=".16"/></filter>
```

CONTRAST MATRIX ONLY PASSING PAIRS ARE APPROVED (MEASURED, WCAG 2.2)

FOREGROUND	ON	PAIRING USE	RATIO	WCAG	VERDICT
 Warm White	 Navy Deep	Hero, dark sections, footer text	17.9 : 1	AAA	✓ Pass
 Gold Light	 Navy Deep	Italic headline accents on navy	11.1 : 1	AAA	✓ Pass
 Navy	 Gold	Primary CTA label	7.4 : 1	AAA	✓ Pass
 Navy	 Paper	Default body text	14.5 : 1	AAA	✓ Pass
 Muted-2 (new)	 Paper	Secondary text on light	5.2 : 1	AA	✓ Pass
 Muted Light	 Navy Deep	Secondary text on navy	9.0 : 1	AAA	✓ Pass
 Gold	 Navy	Large fares / numerals on navy	7.4 : 1	AAA	✓ Pass
 Gold Text (new)	 Paper	Small gold mono labels on light	5.2 : 1	AA	✓ Pass

Corrections vs the proposal deck: #778087 and #B27123 on paper both measure ~3.5:1 below AA for text. They stay **decorative only** (icons, hairlines); the two 'new' tokens are their AA-safe text replacements.

SECTION 03

Three fonts. Zero improvisation.

The editorial hybrid.

The brand voice is set in **Fraunces** (serif display), **DM Sans** (UI text) and **DM Mono** (labels & data) – the exact trio from this proposal. Self-host all three; never rely on system fallbacks.

DISPLAY / EMOTION

Fraunces

SECTION 03 CONTINUED

Type in context measure twice, build once.

[HOME](#) [HERO HEADLINE](#) 60PX

Agra to anywhere,
in first-class comfort.

Sedans, SUVs and Tempo Travellers with verified drivers. Transparent fares, UPI advance payment, and a confirmed booking in under two minutes.

EYEBROW: DM MONO CAPS +0.16EM

ITALIC ACCENT #F3C36C NAVY ONLY

COMPOSITION RULES

01 One italic accent per headline

Colour one meaningful phrase in the serif italic gold-light on navy, coral on paper. Never two accents.

02 Serif = emotion, sans = function

Headlines and fares in Fraunces; everything actionable in DM Sans. Never mix roles.

03 Mono is always uppercase + tracked

DM Mono lowercase reads like code, not a label. Lock caps + +0.08 to 0.17em.

04 Line length discipline

Body copy 52 68 characters; leads max 62. Cards never exceed 3 body lines.

05 Numeric alignment

Fares and route tables use DM Mono figures so columns align; prices never in serif.

06 Hierarchy by weight, not size jumps

Inside cards: Fraunces 24 28 title, 14 16 body, mono 9 tag. Nothing else.

LIVE SCALE SPECIMEN

[EYEBROW](#) DM MONO 10PX CAPS

Tempo Traveller, 17 seats.

Body 16 Spacious pushback seats, luggage bay and ice-box. Ideal for family tours and outstation group travel from Agra.

7,500

PER DAY ALL-INCLUSIVE SAMPLE

Anatomy eyebrow introduces, serif title names, sans body explains, mono data prices. This 4-layer stack is the whole vocabulary: every card, hero and panel is a variation of it.

SECTION 04

An 8-pixel rhythm,

navy-deep calm.

All spacing derives from an 8px base unit. Components keep the radii and densities proven in the proposal deck; only the presentation scale changes for a marketing website.

SPACING SCALE THE ONLY VALUES ALLOWED

LAYOUT CONSTANTS

PROPERTY	DESKTOP	MOBILE	NOTES
Header height	78px	64px	Fixed, navy, blur on scroll
Container max	1140px	100% - 32px	Centered; full-bleed only for hero/footer art
Section padding Y	96 / 72px	56px	Alternate navy / paper sections
Card gap	16 24px	14px	One value per grid, never mixed
Card padding	22 24px	18px	Matches deck service cards
Control height	44px min	44px min	Buttons & inputs touch minimum
Radius cards	3 4px	3 4px	Nearly square = premium; no big blobs
Radius pills/badges	999px	999px	Only true pills are fully round

BREAKPOINTS INHERITED FROM THE PROPOSAL DECK

SECTION 06

Photography that sells *the journey, not the car.*

The approved hero is a luxury sedan on an open highway at dusk navy skies, golden light. All photography follows this grade: cool navy shadows, warm gold highlights, gentle film grain.

TREATMENT RECIPE EVERY PHOTO, NO EXCEPTIONS

01 **Grade**

Cool shadows toward navy (#0B171E tint); lift warm highlights toward gold.

02 **Overlay**

Hero: 90 navy overlay .96 .17.
Thumbnails: 180 bottom overlay .10 .62.

03 **Grain**

feTurbulence film grain at 16% opacity over photographic areas only.

04 **Export**

WebP/AVIF, q 82, 2 retina, hero 220KB; lazy-load below the fold.

SHOT LIST WHAT TO PHOTOGRAPH

- Sedan / SUV front three-quarter at golden hour, Agra skyline
- Highway sweeping curve with copy space on the left
- Taj Mahal dawn + car silhouette (tour packages)
- Driver opening the door uniform, warm smile
- Interior: clean leather, bottled water, AC vents
- Group boarding a Tempo Traveller at the depot

ICONOGRAPHY & LOGO

Icons: 24px grid, 1.5px stroke, round caps & joins (deck style), sizes 16/20/24. Line only never filled or emoji sets.

Logo: mountain-road monogram, gold spark #F3B34C. Clear space = mark height on all sides. Min 28px digital / 12mm print. Warm-white mark on navy; never recolour the spark.

Banned: clip-art cars, gradient stickers, HDR-crushed skies, watermarked stock, more than one gold focal point per image.

Hero production note: shoot or commission one master 21:9 frame (above) and derive hero, OG banner (1200 630) and package thumbnails from the same grade consistency reads as premium.

SECTION 07

Motion is seasoning

180ms is enough.

The deck runs on a single timing: 180ms ease. The website keeps that discipline — motion confirms actions and guides focus; it never performs.

THE MOTION VOCABULARY

THE ONLY SANCTIONED MOVES

MOVE	SPEC	TIMING	WHERE
Hover lift	transform: translateY(-2px)	180ms ease	Buttons, cards, nav CTA
Hover grow	shadow 0 12px 23px rgba(22,39,48,.14)	180ms ease	Pairs with lift
Colour shift	background / colour only	180ms ease	Links, tabs, chips
Under-bar slide	2px gold bar scales in	180ms ease	Nav active link
Card image zoom	scale(1.03) inside overflow:hidden	400ms ease	Fleet & destination cards
Section reveal	fade + translateY(12px) in view	320ms ease-out	Once per element, no replay
Drawer / sheet	slide in from edge	240ms ease-out	Mobile nav, filters
Live-dot pulse	halo ring 1 1.6, alpha to 0	1.6s loop	Booking availability only

INTERACTION RULES

- Feedback < 100ms:** busy states show instantly — skeletons for fares; the spinner lives inside the pressed button.

Reduced motion: prefers-reduced-motion switches all transforms off — instant fades only. Honour it.
- Focus always visible:** 2px gold outline + 2px offset on every interactive; tab order follows the page.

No scroll-jacking: native scroll always; sticky allowed only for the header and the booking summary.
- Nothing loops forever:** no carousels, auto-sliders or parallax. The live-dot pulse is the only allowed infinite animation.

Delight budget: one 'moment' per page, e.g. the booking ticket flipping to CONFIRMED.

EVERY INTERACTIVE ELEMENT SHIPS SIX STATES

- DEFAULT

HOVER

FOCUS

ACTIVE

DISABLED

LOADING

A pull request missing a state fails design review. Keep states in CSS custom-property pairs so navy and paper sections never fork component code.

SECTION 08

From first visit *to paid advance.*

North Star (from the deck): **make travel feel easy before the journey begins.** Every page answers one question and offers one obvious next action.

SITEMAP & PAGE JOBS

PAGE	JOB (ONE LINE)	KEY SECTIONS	PRIMARY CTA
